LIST OF SERIALS INDEXED FOR ONLINE USERS

2002

INTRODUCTION

The National Library of Medicine (NLM) designed the *List of Serials Indexed for Online Users* to provide bibliographic information for serials from which articles are indexed with the MeSH® vocabulary and cited in MEDLINE®, the backbone of NLM's PubMed® database. Citations from these serials date back as far as 1966 and include data from all serials indexed for the formerly separate NLM databases AIDSLINE® and HealthSTAR, and data from core serials indexed cover-to cover for the formerly separate databases BIOETHICSLINE®, HISTLINE®, and SPACELINE™. More detailed bibliographic data and information about indexing coverage for serials cited in PubMed can be found in LOCATORplus, NLM's online catalog at <http://locatorplus.gov>.

The NLM unique identifier (JID) or title abbreviation (TA) found in the MEDLINE display format in PubMed can be used as search keys in LOCATORplus.

The 2002 edition contains 9,930 serial titles, including 4,498 titles currently indexed for MEDLINE, cited alphabetically by abbreviated title followed by full title.

The symbol “s”) is used before titles that are indexed selectively, i.e., indexed only for articles relating to the field of biomedicine. The symbol “*” identifies titles indexed in *Abridged Index Medicus*, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called “Core clinical journals.”

FILING ORDER

Entries are sorted letter by letter. Numbers sort before letters. Special characters are ignored in sorting, except for the “&”, which sorts before numbers.

ABBREVIATIONS OF TITLES

The title abbreviations appearing in the *List of Serials Indexed for Online Users* are constructed using the *List of Serial Title Word Abbreviations* (LSTWA). The LSTWA is maintained by the ISSN (International Standard Serial Number) International Centre. For more information about the Centre and its LSTWA, please consult the ISSN Web site at <http://www.issn.org>

DATES OF PUBLICATION

The dates of publication appear on the line below the title. These data contain the date of the first issue for titles currently published and the first and last dates for titles that have ceased publication or have been superseded or continued by another title. Unknown years are indicated with a “?”. The dates given are publication dates, and do not necessarily represent NLM's holdings or issues indexed. Information about NLM's holdings and indexing coverage can be found in LOCATORplus, NLM's online catalog, at <http://locatorplus.gov>.

INTERNATIONAL STANDARD SERIAL NUMBER

The International Standard Serial Number (ISSN) is a serial identifier consisting of a unique seven-digit number and an eighth check digit. The ISSN uniquely identifies a serial title, regardless of language, and is therefore useful in international information exchange and in machine storage of serials data. The ISSN is assigned to a serial title by the appropriate national center of the ISSN Network, which is coordinated by the ISSN International Centre in Paris. The National Serials Data Program (NSDP) of the Library of Congress is the United States Center of the ISSN Network. The ISSN is irrevocably linked to the key title of the serial. If the title of a continuing serial changes, a new ISSN must be assigned to the new title. In the *List of Serials Indexed for Online Users*, the number, if known, is preceded by the abbreviation ISSN. More information about the ISSN is available at <http://www.issn.org>.

NLM UNIQUE IDENTIFIER

The NLM unique identifier consists of either a number with up to nine digits or an eight-digit number followed by an alphabetic character. It is used by medical libraries in reporting serial holdings data to SERHOLD®, NLM's database of machine-readable holdings statements for serial titles held by U.S. and Canadian biomedical libraries. The unique identifier appears opposite the ISSN. In PubMed this number is labeled as “JID” in the MEDLINE display format.

PERMANENT PAPER NOTICE

Entries for indexed serials known to be printed on acid-free paper contain the designation ‘ACID-FREE’. The ACID-FREE notice appears above the NLM unique identifier.

To report other indexed serials printed on acid-free paper, contact: Head, Preservation and Collection Management Section, National Library of Medicine, 8600 Rockville Pike, Bethesda, MD 20894. To obtain information about permanent paper and how to indicate its use, see the latest edition of American National Standard ANSI/NISO Z39.48, “Permanence of Paper for Publications and Documents in Libraries and Archives” at <http://www.niso.org/>.

When requesting serial interlibrary loans from the National Library of Medicine, please include the NLM call number (or On Order or In Process notation) and the NLM unique identifier. The NLM call number, holdings information indicating what issues of a title NLM owns, and detailed bibliographic records can be found in LOCATORplus, NLM's online catalog, at <http://locatorplus.gov>.

Information about journal selection for indexing at NLM can be found at <http://www.nlm.nih.gov/pubs/factsheets/jsel.html>. Questions can also be directed to NLM's Customer Service Desk at custserv@nlm.nih.gov (1-888-356-3656).

The symbol "s" identifies titles which are selectively indexed. Only articles relating to the field of biomedicine are indexed from these journals. The symbol "*" identifies titles indexed in Abridged Index Medicus, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journals."
